# SEBO AIRBELT E1 Kombi, E2 Turbo and E3 Premium

The three AIRBELT E models are powerful, ultra-quiet, lightweight, canister vacuum cleaners that offer innovative design, attractive contours, superb hospital-grade filtration, and an optimized internal airflow pathway that provides powerful suction performance. They feature a 37-foot cleaning radius, a large-capacity filter bag, three on-board attachments, rubber-coated wheels to protect floor surfaces, and a durable telescopic tube with quick-release connections. They also have a full bag or clog indicator, control-switch cord rewinder, and a soft-foam bumper that protects the vacuum, furniture, and walls from scuffs and scratches.

There are two straight-suction models that offer a choice of cleaning heads for use on hard floors and rugs. The E1 Kombi includes a combination nozzle with retractable bristles, and the E2 Turbo offers both an air-driven turbo head and a parquet brush. However, the E3 Premium offers the commercial-quality ET-1 power head that cleans both carpets and hard floors, has excellent pet hair removal, provides manual brush roller shut off, and the extension side of its L-shaped contour makes cleaning under counters easy. A parquet brush for cleaning hard floors with straight suction is also included. The E3's ergonomically designed handle includes the suction adjustment switch, and it provides user comfort and effortless control of the power head's 180° steering ability and super-low, 3.5-inch horizontal cleaning profile.

**Flat-to-the-floor, 3½-inch Profile** – A low, cleaning-head profile makes reaching under furniture and beds easy!

**Mid-size Canister Vacuum** – The AIRBELT E models are considered mid-size canister vacuums, which mean they are smaller, more compact machines that weigh about four pounds less than SEBO's D-model canisters.

**Three Full-size, On-board Tools** – A crevice tool, an upholstery nozzle, and a dusting brush are on-board and ready for use at all times. Also, many optional attachments are available that can be fitted to the telescopic tube or the hose handle.

**Long, 25-foot Cord and 37-foot Operating Range** – Its cleaning radius saves time because it can clean large areas without changing electrical outlets. Plus, the seven-foot suction hose provides superb user maneuverability.

**Control-switch Cord Rewinder** – The power cord rewinds by simply pressing a button.

AIRBELT E3 Premium Arctic White with ET-1 and Parquet Brush #91641AM

AIRBELT E3 Premium Red with ET-1 and Parquet Brush #91642AM

AIRBELT E3 Premium Graphite with ET-1 and Parquet Brush #91643AM

AIRBELT E1 Kombi Arctic White with Combination Nozzle #91602AM

AIRBELT E2 Turbo Dark Blue with Parquet Brush and Turbo Head #91620AM

**Large-capacity Filter Bag** – The .92-gallon filter bag is convenient and economical because fewer bag changes are needed, and closing its built-in hygiene cap prevents dust from escaping during bag removal or disposal.

**Three Protective, Rubber-coated Wheels, Mounted on Steel Axles** – The superb, rubber-coated castor-wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

**Soft-start Feature** – The vacuum’s gradual power-up capability extends motor life.

**Convenient Parking and Storage Aids** – After the work is done, the suction hose and telescopic tube, with parquet brush, turbo head, or combination nozzle, can be firmly stored on the canister’s underside or backside housing.

**Full Bag or Clog Indicator** – When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, an indicator window, located on the canister body, turns orange and an airflow bypass valve opens. This feature prevents over-heating and motor damage from a lack of adequate airflow.

**Patented AIRBELT Bumper** – The soft, textile-covered, foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. It also diffuses exhaust air, which contributes to its ultra-quiet performance.

**Three-step, Hospital-grade Filtration** – It features a pre-motor filter, a three-layer Ultra Bag, an S-class, exhaust microfilter, and a tightly-sealed casing.

## AIRBELT E3 Premium

**Durable Power Head with Manual Height Adjustment, Amazing Steering Ability, and Manual Brush Shut Off** – The E3 comes

standard with the commercial-grade ET-1 power head, which easily removes pet hair, and cleans both carpets and hard floors. It is 12 inches wide and offers four-level, manual brush height adjustment. Also, to clean delicate rugs and hard floors with straight suction, the brush roller can be manually switched off. Its 180° steering ability provides amazing maneuverability.

**Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off** – The ET-1 power head has easy, tool-free brush roller removal, a handy clog removal door, and a red warning light, with automatic shut off, for brush roller obstructions. Also, its warning light remains illuminated during use, when brush height is set too high for optimal cleaning, or when the brush roller should be replaced due to reaching maximum bristle wear.

**Suction Adjustment on Handle. Tapered Suction Hose** – The handle includes a slider switch that provides convenient suction control, for normal to more delicate cleaning tasks. Its unique tapered suction hose further increases airflow velocity and minimizes clogs.

## AIRBELT E1 Kombi and E2 Turbo

The AIRBELT E1 and E2 models are straight-suction vacuums. Thus, they differ from the AIRBELT E3 as follows:

**Turbo Head and Parquet Brush, or Kombi Nozzle, but No Power Head** – The E1 and E2 models have telescopic tubes and suction hoses without integrated power cords, so they do not accommodate electric power heads. Instead, the E1 Kombi comes with only a combination nozzle, with retractable bristles, to clean hard floors and rugs. The E2 Turbo comes with an air-driven turbo head for rugs, and a parquet brush for hard floors.

**Suction Adjustment Switch on Canister Body** – Because the E1 and E2 models have hoses and telescopic tubes without power cords, their suction adjustment switches are located on the canister body, not the handle.

# STANDARD FEATURES OF SEBO VACUUM CLEANERS

**Designed and Manufactured in Germany** – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

**World's Best Pet Vacuums** – Because of superior power-head and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

**Excellent for Users With Allergies or Asthma** – The British Allergy Foundation recommends SEBO filters.

**Reliable, Commercial-grade Components** – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

**Rubber Wheels and Soft Bumpers Protect Homes** – Smooth-gliding, rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the power heads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

**Advanced, Brush-Roller Technology** – SEBO's brush rollers are uniquely designed to funnel hair and debris into the power head's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

**Bagged vs. Bagless . . . Bags are Better!** – Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters. They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

In contrast, without bags to hold nearly all the captured dirt, the microfilters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Lastly, bagless vacuum microfilters are expensive, usually costing more than a multi-year supply of SEBO filter bags.

**Changing Bags is Easy and Clean** – SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

**Save Money! SEBO Vacuums Last for Years and Extend Carpet Life!** – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars, by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

**Incredible Warranty Coverage** – All SEBO models include a FREE seven-year warranty on the motor and five-years on non-wear parts and labor charges.
